

WHAT IS CLAIMED IS:

1. A Christmas lamp bulb, including a lamp bulb, wherein the structure and shape of the wire lead terminal of the lamp bulb are in accordance with the inner hole of the lamp socket; that is, the inner end of the wire lead terminal is a cylinder terminal with a shape of cylinder, whereas the outer end of the wire lead terminal is a rectangle terminal with a shape of rectangle; besides, two lead wires are leading out from the rectangle terminal, and they are bent separately in opposite directions to be attached to the two outer symmetric faces of the rectangle terminal.
2. The Christmas lamp bulb as claimed in claim 1, wherein a protruded ring is provided at the outer end of the cylinder column.
3. The Christmas lamp bulb as claimed in claim 1, wherein a plurality of protruded bars in an axial direction is distributed uniformly at the outer end of the cylinder terminal.
